Library Motion for Kona

Move we submit to the Project Editor as Potential Defect Reports the following issues from 99-0030 == N1206, C++ Standard Library Active Issues List (Revision 9):

Issue	Section	Description
5	21.3.6.8	String::compare specification questionable
7	21	String clause minor problems
11	23.3.5	Bitset minor problems
48	27.4.2.1.1	Use of non-existent exception constructor
54	27.5.2.1	Basic_streambuf's destructor
55	27	Invalid stream position is undefined
69	23.2.4	Must elements of a vector be contiguous?
74	22.2.1.5.2	Garbled text for codecvt::do_max_length
75	22.2.1.	Contradiction in codecvt::length's argument types
110	24.5.3	istreambuf_iterator::equal not const
119	17.4.4.8	Should virtual functions be allowed to strengthen the exception specification?
124	22.2.1.2	ctype_byname<charT>::do_scan_is & do_scan_not return type
125	26.3.2	valarray<T>::operator!() return type is inconsistent
126	22.2.1.1.2	typos in Effects clause of ctype::do_narrow()
132	23.2.2.2	list::resize description uses random access iterators
133	23.3.1	map missing get_allocator()
139	23.1.1	Optional sequence operation table description unclear
