Resolution 8 - Initiate Study Groups to Explore New Areas

JTC1 reaffirms its intention to actively explore new areas of work. This will be done through Study Groups with the following Terms of Reference:

Resolution 9 - Establishment of a Study Group on Web Services

JTC 1 establishes a Study Group on Web Services to elaborate a strategy for JTC 1 contributions to Web Services standardization.

Web Services¹ describes a standardized way of integrating applications over an Internet protocol backbone. The Internet core specifications include Http, URI and MIME. The Web Services core specifications include UML, XML, SOAP, WSDL and UDDI. Used primarily as a means for businesses to communicate with each other and with clients, Web services allow organizations to communicate data without intimate knowledge of each other's ICT systems behind the firewall. Web services thus share business logic, data and processes through a programmatic interface across a network.

¹ Definition inspired from http://www.webopedia.com/TERM/W/Web_services.html

For the purpose of this Study Group, Web Services standardization includes all the middleware, workflow, ontology and process infrastructure standards necessary for the full deployment of Web Services within and between organizations. Excluded are all the domain specific implementation standards and ontology.

The terms of reference for the group are:

- Assess how JTC 1 activities are relevant to Web Services standardization;

¹ Definition inspired from http://www.webopedia.com/TERM/W/Web_services.html

- Assess how the Web Services activities of organizations external to JTC 1 (Consortia, Fora, ETSI, CEN/ISSS, ITU-T) may benefit from JTC 1 involvement. This should include as a minimum the following consortia and fora:
 - JCP
 - OASIS
 - OMG
 - RosettaNet
 - UDDI.org
 - W3C
 - WS-I

JTC 1 involvement may include:

- Publication, through fast-tracks, PAS submissions or other means, of stabilized and de facto Web-Services infrastructure standards as formal international standards.
- Contributing to ensure interoperability between the various implementations from consortia and other groups.
- Contributing, if required, to the definition of conformance specifications.
- Harmonization and adaptation of existing JTC 1 work where necessary.
- Initiate, if judged necessary, any relevant activities within existing JTC 1 Subcommittees that would increase JTC 1 contribution to Web Services standardization activities. These activities should be initiated as soon as they are identified.
- Assist, if judged necessary, consortia and fora in establishing the appropriate liaison with JTC 1. The establishment of these liaisons should be initiated as soon as they are identified.

If the Study Group identifies specific new works in this area that does not fit in existing JTC 1 SCs, the Study Group should recommend to JTC 1 the creation of a new SC or other alternatives.

The Study Group will finalize its report, with a summary of actions that have been initiated during its mandate and any remaining action items, for presentation at the JTC 1 2004 Plenary meeting in Berlin.

The Study Group shall be chaired by Dr. Donald Deutsch. Mr. Francois Coallier will serve as Secretariat.

JTC 1 instructs its Secretariat to send a letter to JTC 1 National Bodies, Liaison Organizations, Recognized PAS Submitters and Subcommittees inviting nominations for participation in the Study Group. Currently, the National Bodies of Canada, France and the US noted their intent to participate in the Study Group.

JTC 1 invites the Study Group to review, modify and confirm these Terms of Reference during its initial meeting.

Unanimous

Resolution 10 - Cooperation on Accommodation Information

JTC1 resolves that SC32, SC35, SC36 and other subcommittees cooperate in the area of *defining the notion* of «accomodation information» (see JTC1/N7082, JTC1/N7137), including *as needed* infrastructure and user interfaces. An initial draft report should be completed and submitted in time for consideration at the October 2004 JTC1 plenary. Mr Erlend Øverby will initiate this cooperative activity and prepare the report.

Unanimous

Resolution 10a - Survey of additional NP criteria by SC35

JTC1 authorises the review by SC35 of the set of proposed new NP criteria for cultural and linguistic adaptability, and their survey of other SC's as to their need for such additional criteria (see JTC1/7286, JTC1/7302-7). The survey should be completed and submitted in time for consideration at the October 2004 JTC1 plenary.

Unanimous

Resolution 11 – Methods to Increase Coordination and Cooperation

JTC 1 agrees that it is desirable to achieve better coordination and harmonization of JTC1 projects with committees external to JTC 1 and that it is desirable to share standardization efforts and reduce duplication of work. JTC 1 requests its National Bodies and Subcommittees to submit contributions suggesting effective means of achieving this type of expanded coordination and communication which would not add a significant resource burden to either secretariats or National Bodies. In particular, use of the standards metadata registry should be considered.

Unanimous

Resolution 12A – JTC 1 Directives, Edition 5 and Subsequent Editions

JTC 1 approves document JTC 1 N 7212 as Edition 5 of the JTC 1 Directives with the modifications identified for Edition 5 contained in document JTC 1 N 7302. JTC 1 instructs its Secretariat to implement the Edition 5 changes and to publish Edition 5 by 1 February 2004.

This is to be implemented for the 5th edition of the Directives.

JTC 1 further instructs its Secretariat to issue a call to JTC 1 National Bodies for comments from National Bodies to further clarify the implementation of this item.

JTC 1 reminds National Bodies that on technical matters, when a National Body is not technically involved in the work and/or feels that it does not have appropriate technical expertise, abstention is an acceptable vote (JTC 1 Directives clause 9.1.2).

Resolution 18 – Clarification on the Use of the Term Freely Available Standard

Noting the concerns expressed by the National Body of Japan in document JTC 1 N 7164, JTC 1 advises its Subcommittees and the ITTF that the wording “Publicly Available Standard” is liable to confusion with “Publicly Available Specifications” which is reserved for PAS and should not be used for standards made available on the World Wide Web at no cost. When referring to standards made available free of charge on the World Wide Web, the term “Freely Available Standard” should be used.

Unanimous
