ISO/IEC JTC1/SC 27 N5494

ISO/IEC JTC 1/SC 27 has established a new working group (WG 4) on Security Controls and Services standards. In the 1st WG 4 meeting held in Glenburn, South Africa, from Nov 13-17, 2006, the WG 4 Plenary has resolved to initiate a new study period on the topic of Application security, focusing on the objectives and scope as defined in the meeting report (see attached N5482).

The purpose of this liaison is to identify any additional requirements that might be needed, and to request ISO/IEC JTC 1/SC 22 to provide input to WG4 for the study period on Application Security.

SC 27 would also welcome any exchange of information and where appropriate collaborative joint working on this topic
