

Business Plan and Convener's Report

ISO/IEC/JTC 1/SC 22/WG 23 (Programming Language Vulnerabilities)

Document: ISO/IEC JTC 1/SC 22/WG 23/N0651

Date: 2016-06-09

PERIOD COVERED: July 2015 – July 2016

SUBMITTED BY:

Convener, ISO/IEC JTC 1/SC 22/WG 23: Vulnerabilities
Stephen Michell
Maurya Software Inc
1969 Rosebella Ave
Ottawa, Ontario, Canada K1T 1G6

Office: +1(613)299-9047

1. MANAGEMENT SUMMARY

- 1.1. JTC 1/SC 22/WG 23 Guidance to Avoiding Vulnerabilities in Programming Languages through Language Selection and Use

1.2. PROJECT REPORT

1.2.1. COMPLETED PROJECTS

ISO/IEC TR 24772:2013, *Guidance to Avoiding Vulnerabilities in Programming Languages through Language Selection*. This is a Technical Report.

1.2.2. PROJECTS UNDERWAY

JTC 1 24772-1, *Guidance to Avoiding Vulnerabilities in Programming Languages*. This is the update of TR24772:2013 for language independent vulnerabilities, following the project split of .

JTC 1 24772-2, *Guidance to Avoiding Vulnerabilities in Programming Languages – Part 2, Vulnerability descriptions for*

programming language Ada. This is the update of TR24772:2013 Annex C for language specific vulnerabilities for Ada, following the project split of TR 24772.

JTC 1 24772-2, *Guidance to Avoiding Vulnerabilities in Programming Languages – Part 3, Vulnerability descriptions for programming language C*. This is the update of TR24772:2013 Annex D for language specific vulnerabilities for C, following the project split of TR 24772.

JTC 1 24772-2, *Guidance to Avoiding Vulnerabilities in Programming Languages – Part 4, Vulnerability descriptions for programming language Python*. This is the update of TR24772:2013 Annex E for language specific vulnerabilities for Python, following the project split of TR 24772.

JTC 1 24772-2, *Guidance to Avoiding Vulnerabilities in Programming Languages – Part 8, Vulnerability descriptions for programming language Fortran*. This is a new Part for language specific vulnerabilities for Fortran.

JTC 1 17960, *Code Signing for Source Code*. This project is to produce an International Standard, and has been published.

1.2.3. CANCELLED PROJECTS

None over this time period. _____

1.2.4. COOPERATION and COMPETITION

Where appropriate, WG 23 has established active liaisons with other SC22 working groups, other JTC 1 subcommittee working groups (such as SC 27/WG 3 and SC 7 WG19) and other standards organizations, such as Ecma International. See the table in 2.3 for a list of liaisons.

There is no apparent direct competition with any other current SC22 working group or JTC 1 subcommittee.

2. PERIOD REVIEW

2.1. MARKET REQUIREMENTS

WG 23 is responding to the needs of the programming language community by inclusion. WG 23 will accept input and liaison by any and all appropriate organizations.

The marketplace demands robust, secure software. Vulnerabilities are the antithesis of robust, secure software. Many of the attacks on software-based systems succeed because the computer language used did not prevent the attack vector, and did not warn the developer that the code being produced contained flaws that could be used to generate attacks.

WG 23 has produced 2 editions of TR 24772, but there are vulnerabilities that still need to be identified, and programming languages that still need to be documented with regards to vulnerabilities.

2.2. ACHIEVEMENTS

WG 23 has published the second edition of TR 24772, and started work on the third edition, after splitting the project and the TR into Part 1, language independent part, and Parts 2 through 8 for language-specific vulnerability descriptions for Ada, C, Python, and Fortran.

2.3. RESOURCES

Seven national bodies have participated in the WG 23 meetings this year: Canada, China, Italy, Japan, Korea, Spain, UK, and the USA, as well as several liaisons.

Over the last several years WG 23 has made Web conferencing capabilities available for those that are finding it difficult to travel. WG 23 would like to thank ISO for the Web conferencing support.

Liaison with five SC22 Language groups, and four groups outside of SC22 have been established. Liaisons fill a valuable role in that they identify the vulnerabilities that exist (and do not exist) in their language, produce the primary documentation of those vulnerabilities and turn them into the relevant language-dependent part in conjunction with the core team through the liaison individual.

Current WG 23 liaisons are:

Group	Name/Type	Person assigned
SC 22/WG4	Cobol	Robert Karlin, Chris Tandy
SC 22/WG5	Fortran	Dan Nagle
SC 22/WG9	Ada	Erhard Ploedereder
SC 22/ WG14	C	Clive Pygott
SC 22/ WG 21	C++	Group
SC 7/WG 19	Open Distributed Processing and Modeling Languages	Cesar Gonzalez- Perez
SC 27/WG 3	Security evaluation, testing and specification	Nomination Pending
ECMA TC39/TG2	C#	Nomination pending
JSR-282/JSR-302	Real-Time/Safety-Critical-Java	Ben Brosgol
Linux Foundation	Linux	Nick Stoughton
MDC	MUMPS	Ed de Moel

Formatted Table

3. FOCUS NEXT WORK PERIOD

3.1. DELIVERABLES

None for this time period.

3.2. STRATEGIES

WG 23 decided in 2015 that a core document and seven language-specific annexes, with at least two or three more in planning, creates a maintenance burden that makes it difficult to keep all portions of the document up to date in a single document.

WG 23 therefore decided to split TR 24772 into a series of parts, as follows (see also clause 4.1 for the official request for SC 22 action):

TR24772-1 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Language Independent View

TR24772-2 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language Ada

TR24772-3 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language C

TR24772-4 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language Python

TR24772-5 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language Ruby

TR24772-6 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language Spark

TR24772-7 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language PHP

TR24772-8 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language Fortran

TR24772-9 Information Technology — Programming languages — Guidance to avoiding vulnerabilities in programming languages through language selection and use – Programming Language COBOL

At the 2015 SC 22 plenary, projects for TR24772-1, 2, 3, 4 and 8 were initiated.

3.3. RISKS

The loss of the previous convenor/editor created a significant loss of expertise and resource for the group, as the remaining members are volunteers instead of funded to do the work. WG 23 has responded by separating the role of convenor and editor for TR 24772, and will assigned different editors to each language-specific part as maintenance to it is initiated.

3.4. OPPORTUNITIES

No special opportunities arise during the next year.

3.5. WORK PROGRAM PRIORITIES

See 4.1.

4. OTHER ITEMS

4.1. POSSIBLE ACTION REQUESTS AT FORTHCOMING 2016 PLENARY

WG 23 has no requests for project changes for this year.

4.2. PROJECT EDITOR The following individuals have been appointed project editors and backup project editors:

- JTC 1 NP 24772-1, Guidance to Avoiding Vulnerabilities in Programming Languages through Language Selection.
□(Project Editor Larry Wagoner, backup Project Editor Clive Pygott)
- JTC 1 NP 17960, Code Signing for Source Code. □Larry Wagoner (Project Editor), backup Project Editor vacant

4.3. ELECTRONIC DOCUMENT DISTRIBUTION

WG 23 has conducted some of its detailed technical discussion using the email reflector maintained by Keld Simonsen. WG 23 also has an ftp and Web site at <http://open-std.org/sc22/wg23>. WG 23 is providing all the appropriate committee documents on the Committee Web site, eliminating the need for paper mailings.

4.4. RECENT MEETINGS

No	Date	Place	Host
25	13-15 Mar 2013	New York, NY	ANSI/INCITS & Blue Pilot
26	08-10 Jun 2013	Berlin, DE	Ada Europe
27	18-21 Sep 2013	Tokyo, Japan	ITSCJ
28	08 Jul 2014	Teleconference	ISO
29	20 Oct 2014	Teleconference	ISO

30	10 Nov 2014	Teleconference	ISO
31	26-27 Jan 2015	Kemah, Tx, USA	Maurya Software Inc
32	26 Feb 2015	Teleconference	ISO
33	30 March 2015	Teleconference	ISO
34	27 April 2015	Teleconference (cancelled)	ISO
35	<u>25 May 2015</u>	Teleconference	ISO
36	26-27 Jun 2015	Madrid, Spain	Ada Europe
37	3 Aug 2015	Teleconference	ISO
38	17-18 Sep 2015	Washington, DC	INCITS
39	27 Oct 2015	Teleconference	ISO
40	23 Nov 2015	Teleconference	ISO
41	11-12 Jan 2016	Orlando, FL, USA	US NB
42	8 Feb 2016	Teleconference	ISO
43	7 Mar 2016	Teleconference	ISO
44	15-16 Apr 2016	London, UK	BSI
45	14-15 Jun 2016	Pisa, Italy	Ada Europe

4.5. FUTURE MEETINGS

#46 Vienna, Austria 15-16 September 2016

#47 Ft. Lauderdale, FL 23-24 January 2017

#48 Toronto, Canada TBD April 2017

#49 TBD, with Ada Europe TBD June 2017

#50 London, UK TBD August 2017
