RESOLUTION M48.38 (Request from ITU-T SG17):

Unanimous

WG2 has reviewed the document N3013 from ITU-T SG17 and has the following responses for SC2 to consider:

1. ITU-T should be discouraged from the proposed common-text approach and pursue referencing ISO/IEC 10646, similar to what ITU-T has done with other SC2 standards in the past; for example, a normative reference can be added to recommendation such as T.51.
2. As to their requests a through f:
 - item a: ISO/IEC 10646 already references ISO/IEC 6429 in a normative way. Further new text will be added to the standard to facilitate ease of reference of the control characters from ISO/IEC 10646.

- item b: New text will be added to clarify explicitly the definitions of terms such as UTF-16BE in the standard.
- items c, d and e: We need further clarification on the nature of the request from ITU-T SG17. WG2 requests SC2 to invite ITU-T representatives to participate in the next WG2 meeting. The project editor will review these items and draft appropriate text for discussion at the next WG2 meeting.
- item f: WG2 agrees with ITU-T SG17 that there are trademark issues and we are not in favour of changing the expansion of the term UCS.

3. WG2 nominates its convener Mr. Mike Ksar to be the liaison representative to ITU-T and requests SC2 to approve this nomination, and to prepare a liaison statement communicating SC2's response in more detail, along with a reference to document N3057 regarding the Unicode Consortium's status as an ARO.
