

ISO/IEC JTC1/SC22/WG9 N664

10 February 2026

On 23 January 2026, after a round of small-committee revision, Randy Brukardt, as the copyright owner and on behalf of the ARG, delivered the first Final Draft Amendment, FDAM 1, to ISO/IEC 8552:2023.

Hereby I am launching a formal ballot within WG 9 to determine whether FDAM 1 should be sent to SC 22 for eventual publication as the new International Standard ISO/IEC 8552.

Accordingly, said ballot is conducted on the following resolution:

The WG 9 Convenor shall forward to the SC 22 Committee Manager document FDAM 1 as provided by AXE Consultants for eventual publication as the new International Standard ISO/IEC 8552.

Please address your response to this ballot to **wg9@ada-auth.org** by 23 March 2026 at the latest, with a vote of: Yes / No / Abstain.

When voting No, please state the reason for that.
