X3J16 DOCUMENT LIST, Rev. 1

After consultation with X3 officials, Dmitry Lenkov has advised me that only official committee documents, i.e., those we wish to make available to the general public, are to be assigned document numbers. I have, therefore, removed from this listing all those documents which were distributed at the technical sessions on exception handling; some of those represented papers to be presented at conferences, and the organizers gave permission to distribute them to the committee, not to have them published by X3. In any case, the technical sessions were not part of the official deliberations of the committee, so the papers involved should not be part of the official record.

If you will be creating a document which should be part of our official record, please get a document number from me BEFORE you distribute it and follow the recommended X3 form as closely as your software allows, including the document number in the header. I can be reached for document numbers at the above email addresses or via telephone at (508) 443-5779. Thanks in advance for your cooperation.
